Objective

Passionate web application developer with 1 year of hands-on experience in React,nextjs Redux, and GraphQL, along with a good understanding of backend technologies such as Node.js and MongoDB. Seeking an opportunity to work on innovative projects, collaborate with talented teams, and continuously grow in the ever-evolving field of web development.

Experience

- 4Labs Technologies Technopark Phase-3** 24-04-2023 - Present
Front end developer
As a React Developer within the company, my responsibilities included creating user-friendly interfaces and responsive designs. I also gained experience in backend technologies like Node.js, MongoDB, and Express, assisting in building efficient server-side solutions. Collaborating with teams, I ensured smooth integration between frontend and backend, enhancing overall application performance.

Projects

- Makers Portal**
Developed and launched a live Australian eCommerce application using React, Redux, and GraphQL API. Oversaw the entire development process, from initial planning to deployment, ensuring robust functionality, seamless user experience, and scalability. Actively collaborated with cross-functional teams to meet project goals and deliver a high-quality product.

Skills

- Front-End Development: React.js Proficient in building and maintaining React components, managing state, and handling props.
- Proficient in developing dynamic, SEO-friendly web applications using Next.js, leveraging server-side rendering and React for optimal performance."
- State Management: Redux Experience in implementing Redux for efficient state management in web applications.
- Data Query Language: GraphQL Knowledge of using GraphQL for optimized data retrieval and interaction with APIs.
- Version Control: Git Familiar with Git for version control, branching, merging, and collaborative software development.
- Good understanding of Node.js, GraphQL, MongoDB, and Express, with the ability to support backend functionalities and integrate them with frontend systems for project requirements.

Technical Skill Set

- Programming languages : Javascript
- Data query language : Graphql
- Front end technologies : ReactJs,NextJs,HTML,CSS
- Version Control : Git
- Backend technologies : Nodejs, Express
- Database : Mongodb

Education

- Mar Ephraem College of Engineering and Technology** 2022
